

Mini Space Mobile

This activity kit contains:

1. Make and do activity steps 1 - 5
2. Ten template pages (5 colour & 5 linework to colour in)

Visit <http://play.powerhousemuseum.com>

Things you need:

- 2 x 25cm lengths of very thin dowling
- 4 x wooden or plastic beads that fit the end of the dowling (optional)
- strong cotton or thin string
- cardboard
- craft glue stick
- scissors
- print-outs of templates

If you have printed out the Black linework templates to colour in, you will need paints & paintbrushes, or textas.

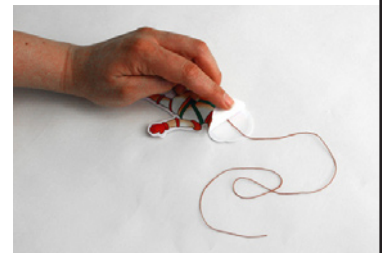

1 For each space object, carefully cut out the front and back pieces leaving the small white border. Colour in if you have chosen the line-work templates.

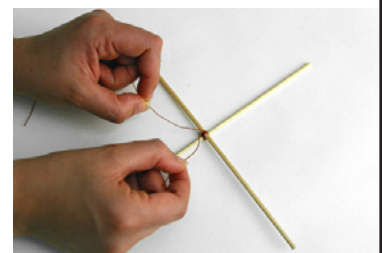

2 Cover the back of one side with glue. Position the two sides of each space object back-to-back but keep the top end open to put the thread into.

3 Position the end of a 30cm long thread between the back and front panels and press the two sides together.

4 Bind the two pieces of dowling together at the centre and tie tightly, leaving a long end of string to hang the mobile.

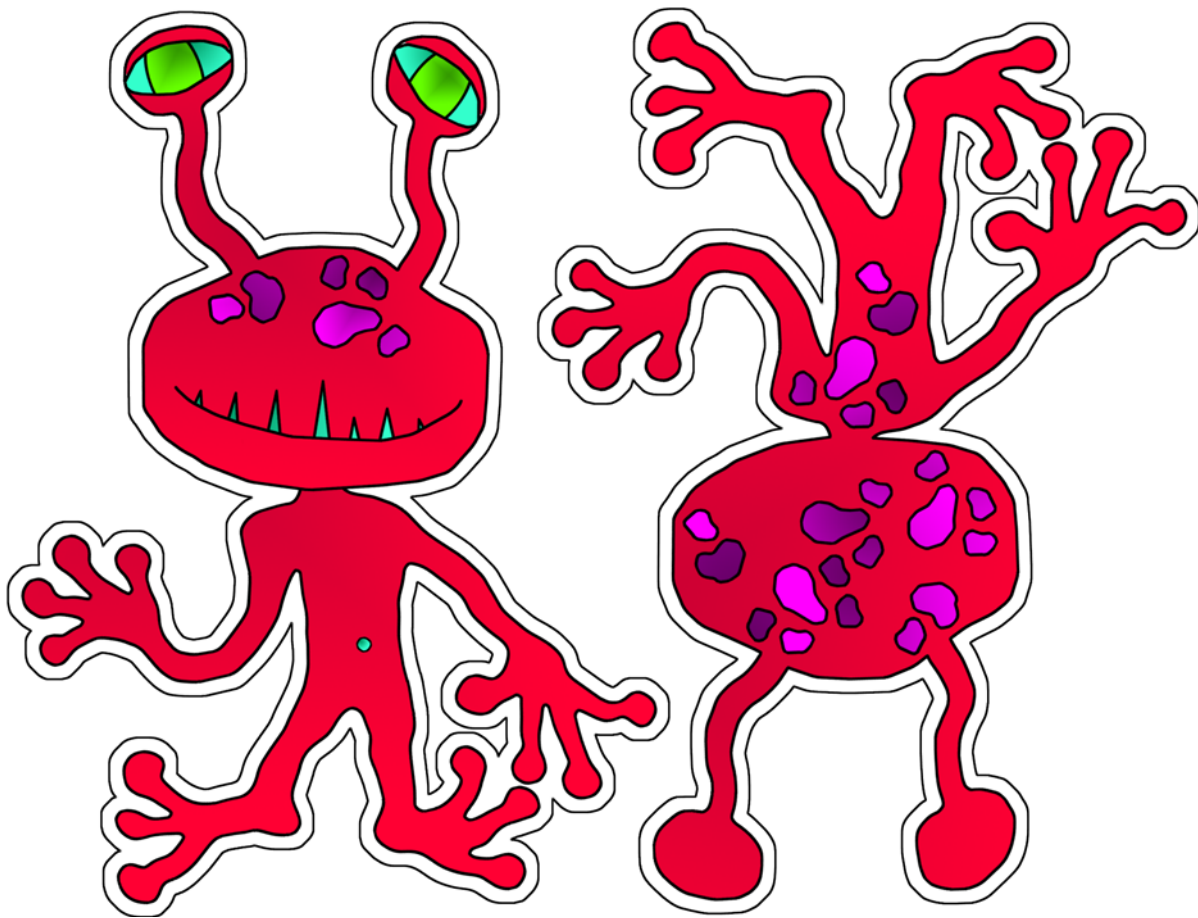

5 Tie a space object to each end of the two dowling pieces, and the final space object in the centre as pictured. Adjust the weight till its hanging straight.
